

FOOD FOR LIFE

FOOD AND DRINK STRATEGY SUPPORT PACKAGE

We support and empower NHS leaders to put good food at the top of the agenda for patients, staff and visitors: our expert tailored approach draws on experience of working with over 70 hospitals, trusts and health boards across the UK.

Struggling to develop a meaningful food and drink strategy? Our support package is designed to help NHS trusts develop a strategy with multi-disciplinary input, helping you to meet the requirements outlined in the NHS Standard Contract and Hospital Food Standards Panel report.

Food for Life's bespoke tailored support helps you to identify priorities and challenges, and supports you to take a **multi-disciplinary approach to drive change.**

Examples of what your package could include:

- **A senior multidisciplinary meeting:** Identifying strategic priorities and understanding challenges.
- **A review of trust wide policies and site visit:** Benchmarking against national best practice and the requirements of the Food and Drink Strategy; identifying strengths and highlighting opportunities for change. The review will include written feedback.
- **A bespoke multi-disciplinary workshop for key senior staff:** Bringing together the key stakeholders involved in food, to work in partnership to develop your strategic vision for food.
- **Next steps resources:** Including a report based on the key issues raised in the workshop and action plan templates.
- **A draft food and drink strategy:** Including follow up meeting to finalise the strategy
- **Progress review meetings:** Including facilitation support and input from a Food for Life expert at multi-disciplinary meetings to review your progress and refine next steps.
